Experience

MXS Solutions

Mar - June 2019

General office work with use of Wordpress based Website Management platforms updating online content for major dealerships with some HTML and Javascript application. The main assignment besides common office work was creating landing pages with artistic and aesthetic appeal to client's standards, produced product landing pages for custom lifted trucks of Tuscany Motors to be placed in major dealership sites.

Ventura Digital Arts

June 2017 - present

IT and Social Media Consultant

Applied best practices in team settings to advance web applications and Social Media needs of my clients, including some SEO, marketing campaign development, implementation, and maintenance. Solved and troubleshooted multiple marketing and web development challenges.

WyzAnt

June 2016 - January 2018

Tutoring clients in C++ programming, Calculus and Russian language.

Tutoring clients in Russian, as a native speaker, I was able to help my clients with the proper use of the language structure and business etiquette for Russia and other Eastern European countries.

IT Consultant

2006 - present

Providing clients with valuable insights and guidance on strategies and implementation of web solutions including marketing, design, and maintenance. I was able to use my critical thinking to find unique solution with high priority needs. Meeting strict timelines and developing content heavy processes, I was able to establish strong relationships with my clients.

United Autobrokers and Sales

2003 - 2006

After working as a California licensed salesperson in several dealerships of Los Angeles, I was brokering new luxury vehicles to select upscale clients. I also went to auctions to bid on and to purchase slightly used luxury vehicles to be sold under the brokerage license.

Education

AWS Certification Courses

Moorpark College: SQL Databases

Los Angeles Valley College: 2 year C++ Programming Certificate

Los Angeles Pierce College: Computer Science Transfer Program

Russian State University of Tourism and Hospitality:

BA in Consumer Goods and Industrial Design

Volunteering

Thomas Fire Help – Developed thomasfirehelp.com responsive web application and went live in urgent manner under the high stress of the natural disaster to assist victims with available help from the private sector and to distribute the resources where they were most needed.

Hackathon by the Sea – Led C++ project workshop.

Game Developers Meetup – Developed logo, prints and websites for the gamers association. Served as an organizer and a judge at the Global Game Jam, Ventura County.
